

According to information maintained by the Office of the Development Commissioner, Small Scale Industries, Ministry of Small Scale Industries, the growth of registered units and un-registered units during the period from March 2004 to March 2006 has been 10.24% and 7.98% respectively. The status on number of food processing units in the organized sector and in the SSI sector as of March 2004 and March 2006 is as below:

As of	Registered Units	Unregistered Units
March 2004	2,45,690	14,03,717
March 2006	2,70,853	15,15,739

Besides, number of Industrial Entrepreneurs Memoranda (IEMs) filed in the Food Processing Industry sector during the years 2004 and 2005 are 238 and 241 respectively.

State of power generation

*372. SHRI P.R. RAJAN: Will the Minister of POWER be pleased to state:

(a) whether the present power generation is in accordance with the Tenth Five Year Plan target;

(b) if so, the details thereof including the target and power generated during the Tenth Five year Plan, State-wise and category-wise as on date;

(c) if not, the details of reasons for the same;

(d) if so, whether there is any proposal to diversify the energy sources; and

(e) if so, the details thereof and the steps taken to implement the same?

THE MINISTER OF POWER (SHRI SHUSHILKUMAR SHINDE): (a) to (c) Targets for power generation are fixed for various power stations on annual basis. The overall achievement in actual power generation in last 4.5 years of the Tenth Plan has been about 99% of the generation target.

Year-wise details of actual power generation and the target during the Tenth Plan are given below:—

Year	Generation Target	Actual Generation	Actual Generation as % of Target	Growth in Power Generation over the previous year
	(MU)	(MU)	(%)	(%)
2002-03	545552	531607	97.4	3.2
2003-04	572900	558336	97.5	5.0
2004-05	586412	587416	100.2	5.2
2005-06	621500	617510	99.4	5.1
2006-07*	437396	436299	99.7	7.3

*April-November, 2006

From the above, it may be seen that the generation target have been almost fully met and particularly during the last three years, the actual generation was more than the target or almost equal to the target. However, the actual generation could have been substantially more than the target, had there been no shortage of gas for the gas based power plants.

The details of State-wise and category-wise target and actual generation during various years of Tenth Plan period are given in Statement (See below).

The main reason for short fall in achieving the generation targets has been inadequate supply of gas for gas based power plants.

(d) and (e) A mix of coal, lignite, gas, liquid fuels, hydro and renewable energy sources is being utilized depending on their availability, exploitability and price. In addition, efforts are being made to tap the surplus power from captive and co-generation plants. With the liberal provisions of the Electricity Act, 2003 in respect of captive power plants, there is possibility that a number of them may feed their surplus power into the grid.

Statement
State wise & Category wise Target and Actual Generation during Tenth Plan Period
